

# Newsletter 4

August 2021

Dear colleagues,

Linkcommunity partners were engaged, in the last stage of the project, in the implementation of **Community projects** aimed at promoting education and social activities for the activation of the local education community.

Teachers, Trainers, other professionals, volunteers, parents... were involved in the design and implementation of local plans, inspired by the collected practices and the contents acquired during the last transnational training.

An inspirational collection of practices for Community projects is now available in our website, in the section **RESOURCES**, to inspire colleagues from other organizations and countries.

The objectives of these initiatives are:

- ⊙ promoting and enhancing the educating communities,
- ⊙ developing paths and support services for parenting and interventions to combat social and economic exclusion,
- ⊙ focusing on a networking strategy between all the stakeholders of the educating community for "community welfare projects"

During the last transnational partners meeting hosted in Turkey our consortium reflected in the results of the project actions and developed the practical tool for the impacts assessment.

**A great opportunity to plan the follow up  
action of our project!**
